Stepping on to campus after Design Jam was a fun experience because I already knew, met and liked people in my classes. During my time here I have learned many things, one being time management. There are a lot of projects essays and presentations due around similar dates. Yet what I discovered is if you actually start the day they tell you about it, it makes the completion a whole lot easier.

My favorite project this semester was using Auto Cad to make our own Logo. First of all when learning the program I had a blast just messing around with the different features of the program. It didn't take me long to understand how it worked. The first time I laser cut it came out perfect. Although mine wasn't the most intricate I really liked my logo because there was meaning behind it.

There aren't many assignments I would say I'm not proud of but I guess if I had to chose one our recent one in design tech. Although it turned out fabulous and the way I wanted it to I never really got the chance to prototype. Do to the fact that I had switched from Cad to Adobe to Cad. I ended up having to redo the whole thing all over again in Cad. Which took up a lot of time so I only got to print the final.

There were minor mistakes on it although no one noticed I did and wish I had a chance to correct them the project was to make a package design. I made mine for an Aztec necklace my dad gave to me when I was 5. I made the package in the shape of a lantern and laser cut designs on the sides for light to shine through so it could become a light/candle.

Through these projects what I learned about my self as a student is I like to get work done ahead of time, Being early to classes, and attentive learning . Getting my work done ahead of time allowed me to have more free time and also correct errors on my papers. Being early to class takes away the stress of not knowing if you are missing anything while you were absent. Being attentive during class and taking

good notes is the key to a good college student

NO

[TIME MANAGEMENT / PROCRASTINATION]

- HEALTHY / HAPPY
- COMPLETE HW = LESS STRESS
- ON TIME

7 WAYS ORGONIZE, PLAN, PRIORITIZE, NO OVERLOAD
STUDY, FLEXIBLE, VISION

- BREAK DOWN TASKS.
- SHORT BREAKS
- NO PROCRASTINATION
- ☆ GOALS → SEQUENCE
- MAJOR PROJECTS early.
- PUNCTUAL, Prepared, Participate, eager to Learn
- ASK FOR HELP.
- NO DISTRACTION
- excercise
